

Model: HSS-550 (Single), HPS-555 (Paired)

PS Flood Barriers™
Solutions That Hold Water

Hinged Flood Barriers

PS Flood Barriers

Hinged Flood Barriers are designed specifically for the height of water protection you require. The barriers are permanently installed and stored in the open position. During flooding, the Hinged Flood Barrier is swung closed and is latched, providing flood protection. The Hinged Flood Barrier is available in a single swing or paired swing configuration.

The Hinged Flood Barrier comes in two variations. The HSS-550 is a single swing flood barrier and the HPS-555 is a “paired swing” flood barrier. Depending upon the layout of your facility, the offering of a single or paired hinged barrier allows for flexibility when designing the flood protection system.

Standard Features:

- Available in mild steel, stainless steel, or aluminum.
- Compression seal—requires no compressed air for activation.
- Latch system designed for simple, quick deployment.

Application Use:

- Walk doors.
- Sectional doors.
- Retaining walls.
- Driveways.
- Store fronts.
- Interior hallways/room.

Benefits:

- Quick placement when needed.
- Can be done with or without a raised sill.
- Minimum personnel needed to close flood barriers.

Custom sizing and design available.
